

Our Bighorn AI Kit™ brings a semi-automated workflow for a non-expert to build AI models and deploy to edge devices in minutes.

- + **FAST/USER-FRIENDLY AI BUILDING:** Both technical and non-technical users can easily create or update AI by navigating through a set of images and tagging the images of interest. Synthetic RAIC auto-labeling and rapid training expands the dataset and builds AI in minutes instead of hours.
- + **OPTIMIZE, DEPLOY, AND TRACK AI ON MULTIPLE DEVICES:** With partner LatentAI Technology Inside: Bighorn AI Kit creates optimized AI for each device type for improved deployment, run speed, and power usage.
- + **RUGGEDIZED FORM FACTOR:** Bighorn AI Kit is ruggedized for military toughness and packs graphics processing unit (GPU)-enabled compute and massive storage—all in the size of a carry-on suitcase.
